Essa Arshad

Lahore, Pakistan | +92 307 777 2929 | eessashahid@gmail.com | linkedin.com/in/essaarshad | GitHub

OBJECTIVE

Software Engineer experienced in building AI-powered products, full stack applications, and data driven systems using Python, Javascript, APIs and machine learning.

EDUCATION

Lahore University of Management Sciences — **Lahore, Pakistan**

Bachelor of Science in Computer Science ***GPA: 3.56*** — *May 2025*

Selected Coursework: Software Engineering, Machine Learning, Distributed Systems

EXPERIENCE

ImportYeti — **California, USA (Remote)**

Software Engineer — *October 2025 – Present*

- Built an internal AI operations platform on OpenClaw and the Claude API, including a CRM with automated customer outreach that grew API-driven revenue by 15%.
- Engineered a human-in-the-loop agent review system with drafting queues, automated test suites, and Langfuse observability, tracing 3,000+ agent runs per month.
- Designed a tariff revision tracker codifying applicability criteria and duty calculations for US import compliance, cutting manual research time by 60% and classification errors by 30%.

Metal — **Lahore, Pakistan**

Software Engineer Intern — *September 2025 – October 2025*

- Shipped and iterated on the company's marketing site in Webflow, supporting the product's public launch with 12 pages built/redesigned under launch deadlines.
- Partnered with a four-member team on QA, resolving responsive and UX issues across desktop, tablet, and mobile breakpoints.

Arbisoft — **Lahore, Pakistan**

Software Engineer Intern — *June 2023 – August 2023*

- Delivered 10+ production-grade REST APIs with Django REST Framework, adding authentication, pagination, and RBAC across three micro-services.
- Built automated unit and integration tests, increasing backend test coverage to 85% and improving release reliability.

PROJECTS

DismissalIQ – ODI Wicket Prediction & Strategy Engine — **Lahore, Pakistan**

Final Year Project – Data Scientist — *September 2024 – Present*

- Built an end-to-end data stack that scraped, cleaned, and normalized 3,300+ ODI matches, unlocking granular player insights.
- Leveraged GPT-4o mini and commentary-aware NLP, achieving 75% top-2 accuracy via an 11-feature ablation study.
- Collaborated with PCB analysts to align predictions with on-field tactics; findings are powering an interactive dashboard and forthcoming paper.

ProjectFlow – AI-Enhanced Brainstorming & Collaboration App — **Lahore, Pakistan**

Full-Stack Developer — *January 2024 – May 2024*

- Crafted a Flutter app backed by Firebase for secure auth, real-time sync, and rich collaboration features such as task boards and calendars.
- Embedded a ChatGPT-powered ideation assistant that surfaces contextual prompts and smart suggestions.
- Designed adaptive layouts with smooth animations, ensuring seamless UX across phones and tablets.

SKILLS

- **Languages:** Python, JavaScript/TypeScript, C++, SQL
- **AI/ML:** Claude API, LLM agents, Langfuse, RAG, scikit-learn, BERT/transformers
- **Tools & Platforms:** React, Node.js, PostgreSQL, Firebase, Git
